Solar Data Reverse Hack-a-Thon Key Lessons

- Strong pool of talent to embrace and build solutions from solar data sets with college level emphasis on data science
- Hackers were able to identify new resources for their solutions by sharing their expertise with group
- Many residential tools and APIs under radar – need to make sure developers are well aware of tools that are on the market (free)
- Hackers were able to identify new potential partners and hone their solution to key market problems
- Partnering with ETS allowed hackers to network key industry players

Thank you!

Thank you for attending. Please share your questions with our presenters:
